

Did the learner identify that team members currently sit

<p>asked for further guidance on how to move forward. Please reply back with the following:</p> <p>1. What things will have to change on how this team operates and how key stakeholders interact or engage on this project. (Hint: as you have learned, for agile to be successful there are certain prerequisites and it poses certain challenges for leadership/business stakeholders as well)</p> <p>2. The team is new to Agile and based on prerequisites for agile to be successful, please specify if you and your team need any help or training etc. If none, please state that.</p> <p>The product team has undergone training in agile and are very efficient team</p> <p>The approach is Identify the user list and the team. The team collaborates with the users to understand the requirements in greater details.</p> <p>Replay the teams understanding to the users and obtain regular feedback.</p> <p>Adapt the changes as you mature in gathering detailed product requirements</p>	<p>on different floors, and, for agile to succeed, it will be beneficial to get the entire team to sit/work together.</p> <p><input checked="" type="radio"/> 0 pts Didn't identify this need.</p> <p><input type="radio"/> 2 pts Identified the need, but didn't give the correct argument.</p> <p><input type="radio"/> 4 pts Identified the need and gave the correct argument.</p> <p><input type="radio"/> 5 pts Identified the need, gave the correct argument, and suggested a potential solution. <p>PROMPT</p> <p>Harold is pretty impressed by your response and has approved all of your recommendations in previous two responses. He then re-iterated the key criteria for success and asked you if he and his management team should expect anything different from this project in terms for tracking and status updates.</p> <p>Are there any project constraints laid out in the case study that need to be changed/managed since you will be using agile and, in agile, planning, estimation and tracking happens differently?</p> <p><i>Hint:</i> The case study implies certain project constraints/expectations around cost, timeline, other factors that need to managed/changed.</p>	<p>RUBRIC</p> <p>Did the learner identify that agile approaches to estimation, planning and tracking are different, so management should expect to engage with the team differently?</p> <p><input checked="" type="radio"/> 0 pts Didn't identify this.</p> <p><input type="radio"/> 2 pts Identified the need but didn't give correct arguments like (multi-level planning, less upfront but frequent, just in time, just enough, etc)</p> <p><input type="radio"/> 4 pts</p>

Schedule regular scrum review meetings and review the project progress regularly
Validate the progress at as many times as possible

Identified the need and gave the correct argument.

5 pts

Identified the need, gave the correct argument, and suggested a potential solution and additional details.

Did the learner specify that the initial cost and time estimates (\$500,000 and 6 months, respectively) will need to be flexible to allow the team to change the plan based on what we learn?

0 pts

The learner didn't identify this.

2 pts

Identified the need but didn't give correct arguments like adapt and replan, embrace change.

4 pts

Identified the need and gave the correct argument

5 pts

Identified the need, gave the correct argument, and suggested a potential solution and additional details

Did the learner specify that Harold and his leadership team must engage more frequently and attend sprint review meetings? If they need to get a feel for the project, they can always attend the stand-ups.

0 pts

The learner didn't identify this.

4 pts

Identified the need.

5 pts

Identified the need and provided additional details.

Rate the overall quality of the response.

0 pts

Invalid arguments.

1 pt

Valid arguments, but they are incomplete.

2 pts

Valid, complete argument, but some of the supporting details are incorrect.

3 pts

Valid arguments, covered all aspects, and very convincing.

4 pts

Valid, complete, and correct argument. In addition, the learner had some out of the box reasoning, and also quoted some additional details to support arguments.

Any other feedback you have for the learner in terms of the quality, completeness, or correctness of the response?

need to rework
